

Facilitators: The Learning Bar Team with EBP
Number of participants: >60   Number of response: 42
Feedback based on The Learning Bar Google survey

**1. How satisfied were you with the event? On a scale of 1 to 5,(1 being least 5 being most).**

- 5 people voted 2
- 11 people voted 3
- 22 people voted 4
- 4 people voted 5

**2. How relevant and helpful do you think it was for your role? On a scale of 1 to 5,(1 being least 5 being most)**

- 5 people voted 2
- 8 people voted 3
- 19 people voted 4
- 10 people voted 5

**3. How satisfied were you with the venue? On a scale of 1 to 5,(1 being least 5 being most).**

- 5 people voted 3
- 17 voted 4
- 20 voted 5

<b>4.What were your key takeaways from this event?</b>
How to access the survey
Learning meaningful and effective ways to communicate survey results to stakeholders.
Interpreting and presenting data to stakeholders and the community is the primary goal for the survey, and perhaps sharing more success stories and strategies in how to do so would have been helpful.
Working with my colleagues to form relevant and appropriate questions
See how other schools use their data!
It helped to underline the importance of not just taking the survey but properly preparing for it AND using the information wisely.
How to communicate results to the stakeholders.
How to use the interactive charts. - Ways of reporting data
How the questions the students answers are compiled into the reports.
Learning that you can compare charts from the previous years.
The USB key with tools to use. Also how to read and find charts for my school and use the scrapbook. Getting students involved in the processes.
Involving students. - Creating scrapbook amazing. Thank you!
Reviewing the data deeper in order to have the discussions with staff & students.
The importance to the school's success from the information the survey can provide.
Made it relevant to audience and good results with come out of it.
The afternoon was more relevant - perhaps the entire day should have been around building a presentation with results.
Renewed desire to share this information with students and to involve students in the planning stages.
Discussing with colleagues from other school boards.
I really liked the video where students showed the school data. - I found the afternoon portion long.
How to involve stakeholders, involve students. How to drill down data & tell school story. What to think about when putting together a plan.
Get the students involved. - Bring results to Students.

I liked being able to just have freedom to use the tool in a supported environment.
Drill down interactive charts. - Having students analyze data & record suggestions
The importance to include the students.
I love the idea of having students repeating the survey results & getting involved in the process. Great way to engage students in their school life!
Different ways of sharing data with all stakeholders.
The importance of making sure everyone has accurate information and that results are communicated to students.
I think this activity would have been great if I was with my school team. Since I'm the only member of my board, I was lonely in group discussion.
Effective ways to communicate results of the survey (Video -> analysis by students)
Time is what is REALLY necessary to make use effectively of these results
Better understanding of the OurSCHOOL platform. Re-motivated to reintegrate this @ our School & use the results as recommended.

**5. Which information did you find most relevant? [Introduction & partnership]**

Very Relevant: 6  
Relevant: 23  
Not relevant: 10  
Did not attend: 3

**6. Which information did you find most relevant? [Measures of data]**

Very Relevant: 16  
Relevant: 19  
Not relevant: 5  
Did not attend: 2

**7. Which information did you find most relevant? [The role of OurSCHOOL data in planning]**

Very Relevant: 22  
Relevant: 15  
Not relevant: 3  
Did not attend: 2

**8. Which information did you find most relevant? [Creating a data story]**

Very Relevant: 28  
Relevant: 11  
Not relevant: 3  
Did not attend: 0

**9. Which information did you find most relevant? [Developing an OurSCHOOL Presentation]**

Very Relevant: 24  
Relevant: 13  
Not relevant: 5  
Did not attend: 0

**10. Which information did you find most relevant? [Conclusion]**

Very Relevant: 6  
Relevant: 18  
Not relevant: 6  
Did not attend: 1

**11. Which presentations did you find most engaging? [Introduction & partnership]**

Very engaging: 4  
Engaging: 22  
Not engaging: 10  
Did not attend: 2

**12. Which presentations did you find most engaging? [Measures of data]**

Very engaging: 5  
Engaging: 22  
Not engaging: 9  
Did not attend: 2

**13. Which presentations did you find most engaging? [The role of OurSCHOOL data in planning]**

Very engaging: 10

Did not attend:

**16. Which presentations did you find most engaging? [Conclusion]**

Very engaging: 4  
Engaging: 19  
Not engaging: 4  
Did not attend: 2

<b>17. Any additional comments regarding the presentations or overall agenda?</b>
I appreciated the templates, but would like to see further examples from other schools across the Province/Country for how the data is analyzed and used.
Maybe offer the workshop in a shorter time period.
I was expecting a presentation about how to navigate the website and the data.
The video was helpful and inspiring
Good agenda. The topics covered were relevant.
I would have preferred this be a 1/2 day workshop. I felt the first part could've been condensed.
Enabling schools to deliver informed initiative should, to me, have been the driving force behind this presentation. I would have liked for this to be the focus. Too much time spent on "pulling" data from the survey.
Thank you for sharing your expertise.
Thank you for the USB key with presentation and other info.
Data story could have been the morning (product demonstration). The afternoon might have been about how the results have been used (application). We need help with helping people USE their results, beyond just the global report.
I appreciated the length of the day 9h30 - 15h00 is just right.
I liked to have the time to really explore my survey results.
It is important to have the opportunity to discuss these issues with colleagues and the board
This was too long and you need to be more engaging with audience
Condense the information into a half day. Engage the audience better with more interesting presentations and discussions
More case studies. - Particularly when data does not show positive results.
Many questions still and looking forward to answers.
Great intro - Follow up as to the leadership part - How to introduce data & plan. - How to create valid open ended questions
The afternoon session could have been done in the morning. In the afternoon we could have created "our story".
I would have preferred to start with "What to do with the data" - relevance of survey or reliability rather
Case studies, examples & templates were helpful & effective. Tools and ideas are always appreciated!
May not have needed an entire day.
It was long - a lot of group work.
I would like to know the role of each L.B Members that were here today. - I need more information on how to run discussions with stakeholders. We all know how to pull at relevant instruction, but we missed knowledge about to transform awareness to concrete action.
Perhaps more time on us creating our presentation.
I would have liked more time to just play with the data and work within my school team.

<b>18. Any overall feedback for the event?</b>
I would have liked to spend more time on "what does the data actually tell us" (i.e.: more on examples/samples)
Morning was too long. Afternoon was great.
More testimonials or examples from other boards.
Still unsure about how to get over the question about the validity of the survey
The Learning Bar personnel were very helpful and polite.
It was good to get together and discuss the survey, and its benefits and use.
Very good - a little long - morning piece. Hands on better!
Interesting presenters, time to talk... Afternoon are always more difficult...
I wish more of our principals would have attended!
Scheduling the event earlier in the year would have helped, but things I learned here will be used to assess results in preparation for next year.
This presentation has generated more questions about the validity of our results. It has confirmed our belief that we need to dig deeper.
Thanks for organizing this information session!
I believe the contents of the session could have been covered in half the time (9:00 to 12:00 pm for example).
not sure how our pre-survey responses were incorporated into the content of the presentation (beyond one slide of "comments")
Need more hands on and directed instruction, make us do things to keep us engaged
A bit too late for this year survey. However good timing for planning next years survey.
Online feedback form preferable.
I thought it would be redundant however I learned quite a bit - great to see what others are doing.
Presenters were very helpful when questions were asked.
somewhat satisfied
1. Pace for certain sessions was a bit slow. 2. Allows time for Q&A period. 3. Integrate opportunities to share as a whole group. --- It is interesting to hear other schools experiences, questions, challenges. Idea exchange did not go beyond colleagues at table. 4. Being photographed throughout session was awkward.
I would like to see more examples on how schools use results.
I enjoyed having time to "play" with the data available to us... and being able to ask questions.
Great discussions at the table. Very informative to what other schools were doing.
The team was very nice. The presentation unfortunately to support what I was hoping for.

**19. Would you likely recommend this event to a colleague?**

Maybe: 18

Yes: 14

No: 5

**20. Would you like us to contact you regarding any aspect of what was presented?**

Yes: 4

No: 18
